HONORARY EDITORS

Prof. N. Munro (*UMIST*)
Dr. P.J. Gawthrop (*University of Sussex*)

Pages in issues of *IEE Proceedings Part D*, 1986

Pages	Issue No.	Date
1–44	1	January
45–96	2	March
97–144	3	May
145–192	4	July
193–264	5	September
265–320	6	November

This publication is copyright under the Berne Convention and the International Copyright Convention. All rights reserved. Apart from any copying under the UK Copyright Act 1956, part 1, section 7, whereby a single copy of this article may be supplied, under certain conditions, for the purposes of research or private study, by a library of a class prescribed by the UK Board of Trade Regulations (Statutory Instruments, 1957, no. 868), no part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means without the prior permission of the copyright owners. Permission is, however, not required to copy abstracts of papers or articles on condition that a full reference to the source is shown.

An IEE licensing arrangement exists whereby organisations entering into an agreement are legally entitled to make up to ten copies of an IEE paper or article.

Authorisation to photocopy items for internal or personal use, or for the internal or personal use of specific clients, is granted by the Institution of Electrical Engineers for libraries and other users registered with the Copyright Clearance Center Transactional Reporting Service, provided that the base fee of $2.00 per copy is paid directly to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA. 0143–7046/86 $2.00 + 0.00. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale.

Photocopies of individual papers published in the *IEE Proceedings* can be supplied from the IEE Library at 10p per page plus a handling change of 50p per page, which covers the cost of surface mail (airmail extra). The handling charge is waived if reprints are collected from Savoy Place by purchasers.

The telephone number of the IEE London office is 01 240 1871; telex: 261176 IEELDN G; facsimile: 01 240 7735

The IEE is not as a body responsible for the opinions expressed by individual authors.
The IEE is a member of the Association of Learned & Professional Society Publishers.

Subject index

ADAPTIVE CONTROL

A model reference adaptive control system for discrete multivariable bilinear systems with interconnected subsystems. M. de la Sen p165
Adaptive controller with desired pole/zero assignment. C.-M. Lin and B.-S. Chen p301
Adaptive decoupling of a class of multivariable dynamic systems using output feedback. M.O. Tade, M.M. Bayoumi and D.W. Bacon p265
Design of a reduced-order adaptive observer. N. Minamide, P.N. Nikiforuk and M.M. Gupta p133
Multivariable adaptive control of baker's yeast fermentation. D. Williams and P.A. Montgomery p247
Multivariable adaptive controller for a turbogenerator. S.M.Z. Sharaf, B.W. Hogg, O.H. Abdalla and M.L. El-Sayed p83
Online estimation and adaptive control of penicillin fermentation. G.A. Montague, A.J. Morris, A.R. Wright, M. Aynsley and A.C. Ward p240

ALGORITHMS

Adaptive controller with desired pole/zero assignment. C.-M. Lin and B.-S. Chen p301
Adaptive decoupling of a class of multivariable dynamic systems using output feedback. M.O. Tade, M.M. Bayoumi and D.W. Bacon p265
Application of modern control for biotechnological processes. A. Munack and M. Thoma p194
Identification and control of an extruder using multivariable algorithms. L.W. Bezanson and S.L. Harris p145
Numerically reliable software for control: the SLICE library. T.W.C. Williams p73
Regulation and control effort in self-tuning controllers. M.A. Magdy and T.S. Ng p289
Representation and transient behaviour of self-tuning controller for deterministic disturbances. T.S. Ng and M.A. Magdy p285
Self-tuning control of offset using a moving average filter. C.S. Berger p184
Shifted Legendre approach to the analysis and identification of a linear delayed system with a nonlinear gain. D.-H. Shih and F.-C. Kung p127
Simultaneous estimation of state variables and parameters for multivariable linear systems with singular pencil models. Y.C. Chen, J.D. Aplevich and W.J. Wilson p65

BIOLOGICAL EFFECTS

Control in bioprocessing (Editorial). J.R. Leigh and M. Thoma p. 193. J.R. Leigh and M. Thoma p193

BIOMASS

Development of strategies for online estimation of biomass and secondary product formation in growth-limited batch fermentations. L.A. Tarbuck, M.H. Ng, J. Tampion and J.R. Leigh p235
Identification, estimation and control of biological waste-water treatment processes. M.B. Beck p254
Multivariable adaptive control of baker's yeast fermentation. D. Williams and P.A. Montgomery p247
Online estimation and adaptive control of penicillin fermentation. G.A. Montague, A.J. Morris, A.R. Wright, M. Aynsley and A.C. Ward p240
Yeast population models for monitoring and control of biotechnical processes. L. Mariani, E. Martegani and L. Alberghina p210

BIOMEDICAL APPLICATIONS

Biomedical engineering approach of pharmacokinetic problems: computer-aided design in pharmacokinetics and bioprocessing. A. Segui, J.P. Lebaron and R. Leverge p217
Mathematical description of the behaviour of *Chaetomium cellulolyticum*: modelling of the growth on glucose and cellulose substrate. W. Scheiding, M. Thoma, V. Hecht, W. Rosen and K. Schügerl p199

CLOSED-LOOP SYSTEMS

On nonsingular value based design of controllers for robust stability. O.D.I. Nwokah p57

COMPUTER APPLICATIONS

Application of modern control for biotechnological processes. A. Munack and M. Thoma p194
Controllers for LQG self-tuning applications with coloured measurement noise and dynamic costing. M.J. Grimble p19

COMPUTER SIMULATION

Representation and transient behaviour of self-tuning controller for deterministic disturbances. T.S. Ng and M.A. Magdy p285
Stable reduced-order models for discrete-time systems. M. Farsi, K. Warwick and M. Guilandoust p137

COMPUTER-AIDED DESIGN

Biomedical engineering approach of pharmacokinetic problems: computer-aided design in pharmacokinetics and bioprocessing. A. Segui, J.P. Lebaron and R. Leverge p217

CONTROL EQUIPMENT AND APPLICATIONS

A model reference adaptive control system for discrete multivariable bilinear systems with interconnected subsystems. M. de la Sen p165
Application of an extended Kalman filter for state estimation of a yeast fermentation. K.-H. Bellgardt, W. Kuhlmann, H.-D. Meyer, K. Schügerl and M. Thoma p226
Biomedical engineering approach of pharmacokinetic problems: computer-aided design in pharmacokinetics and bioprocessing. A. Segui, J.P. Lebaron and R. Leverge p217
Chaos in Chua's circuit. F. Ayrom and G.-Q. Zhong p307
Control laws for systems with inequality models of uncertainty. A. Świerniak p153
Controllers for LQG self-tuning applications with coloured measurement noise and dynamic costing. M.J. Grimble p19
Design of delayed control systems using Zakian's framework. A. Abbas, J.E. Marshall and K. Walton d313
Development of strategies for online estimation of biomass and secondary product formation in growth-limited batch fermentations. L.A. Tarbuck, M.H. Ng, J. Tampion and J.R. Leigh p235
Fixed-wing-angle BTT control. D.J. Roddy and G.W. Irwin p111
Identification, estimation and control of biological waste-water treatment processes. M.B. Beck p254
Modelling and idetification of a stochastic water-quality system using actual data. K.A.F. Moustafa, M.Y. Gaafar and T. Abu-El-Yazid p159
Multivariable adaptive control of baker's yeast fermentation. D. Williams and P.A. Montgomery p247
Multivariable adaptive controller for a turbogenerator. S.M.Z. Sharaf, B.W. Hogg, O.H. Abdalla and M.L. El-Sayed p83
On nonsingular value based design of controllers for robust stability. O.D.I. Nwokah p57
Online estimation and adaptive control of penicillin fermentation. G.A. Montague, A.J. Morris, A.R. Wright, M. Aynsley and A.C. Ward p240
Optimal deconvolution smoother. T.J. Moir p13
Two-dimensional discrete model with varying coefficients. W. Marszałek p177
Yeast population models for monitoring and control of biotechnical processes. L. Mariani, E. Martegani and L. Alberghina p210

CONTROL SYSTEMS

Control laws for systems with inequality models of uncertainty. A. Świerniak p153
Controllers for LQG self-tuning applications with coloured measurement noise and dynamic costing. M.J. Grimble p19
Design of delayed control systems using Zakian's framework. A. Abbas, J.E. Marshall and K. Walton d313
Identification of finite-order models of distributed systems. I.F. Taylor p276
Model reduction of discrete systems using the power decomposition method and the system identification method. C.M. Liaw, C.T. Pan and M. Ouyang p30
Modelling and idetification of a stochastic water-quality system using actual data. K.A.F. Moustafa, M.Y. Gaafar and T. Abu-El-Yazid p159
Numerically reliable software for control: the SLICE library. T.W.C. Williams p73
On decentralised eigenvalue assignment for large-scale systems with dynamic interconnections. A. El-Kashlan and M. El-Geneidy p121
Principal direction alignment: a geometric framework for the complete solution to the μ-problem. R.W. Daniel, B. Kouvaritakis and H. Latchman p45
Separation of matrix eigenvalues and structural decomposition of large-scale systems. L.S. Shieh, H.M. Dib and R.E. Yates p90
Stable reduced-order models for discrete-time systems. M. Farsi, K. Warwick and M. Guilandoust p137
Two-dimensional discrete model with varying coefficients. W. Marszałek p177

CONTROL THEORY

A note on frequency-response measurement. J.L. Douce p189
Analysis of singular systems using orthogonal functions. P.N. Paraskevopoulos d315
Control in bioprocessing (Editorial). J.R. Leigh and M. Thoma p. 193. J.R. Leigh and M. Thoma p193
Controllers for LQG self-tuning applications with coloured measurement noise and dynamic costing. M.J. Grimble p19
Design of delayed control systems using Zakian's framework. A. Abbas, J.E. Marshall and K. Walton d313
Fixed-wing-angle BTT control. D.J. Roddy and G.W. Irwin p111
Identification of finite-order models of distributed systems. I.F. Taylor p276
Mathematical description of the behaviour of *Chaetomium cellulolyticum*: modelling of the growth on glucose and cellulose substrate. W. Scheiding, M. Thoma, V. Hecht, W. Rosen and K. Schügerl p199
On decentralised eigenvalue assignment for large-scale systems with dynamic interconnections. A. El-Kashlan and M. El-Geneidy p121
On the analysis of singular systems using orthogonal functions. G.T. Kekkeris p315
On the controllability of a class of nonlinear systems with time-varying multiple delays in control. K. Balachandran p297
On using orthogonal functions for the analysis of singular systems. W. Marszałek d315
On using orthogonal functions with singular systems. S.L. Campbell d315
Optimal deconvolution smoother. T.J. Moir p13
Principal direction alignment: a geometric framework for the complete solution to the μ-problem. R.W. Daniel, B. Kouvaritakis and H. Latchman p45
Regulation and control effort in self-tuning controllers. M.A. Magdy and T.S. Ng p289
Reply to comments on a simplified analytical stability test for systems with delay. D. Hertz, E.I. Jury and E. Zeheb d142
Two-dimensional discrete model with varying coefficients. W. Marszałek p177

DESIGN

A two-stage output feedback design. M.S. Mahmoud, Y. Chen and M.G. Singh p279

DIGITAL COMPUTERS AND COMPUTATION

Numerically reliable software for control: the SLICE library. T.W.C. Williams p73

DIGITAL CONTROL

Adaptive decoupling of a class of multivariable dynamic systems using output feedback. M.O. Tade, M.M. Bayoumi and D.W. Bacon p265

FEEDBACK

A two-stage output feedback design. M.S. Mahmoud, Y. Chen and M.G. Singh p279
Chaos in Chua's circuit. F. Ayrom and G.-Q. Zhong p307

FILTERS AND FILTERING

Application of an extended Kalman filter for state estimation of a yeast fermentation. K.-H. Bellgardt, W. Kuhlmann, H.-D. Meyer, K. Schügerl and M. Thoma p226
Self-tuning control of offset using a moving average filter. C.S. Berger p184

INSTRUMENTATION AND MEASURING SCIENCE

A note on frequency-response measurement. J.L. Douce p189

LINEAR NETWORKS

Linear system reduction by the modified factor division method. T.N. Lucas p293
On decentralised eigenvalue assignment for large-scale systems with dynamic interconnections. A. El-Kashlan and M. El-Geneidy p121
Reply to comments on a simplified analytical stability test for systems with delay. D. Hertz, E.I. Jury and E. Zeheb d142

MATHEMATICAL TECHNIQUES

Design of a reduced-order adaptive observer. N. Minamide, P.N. Nikiforuk and M.M. Gupta p133
Linear system reduction by the modified factor division method. T.N. Lucas p293
On the analysis of singular systems using orthogonal functions. G.T. Kekkeris p315
On using orthogonal functions for the analysis of singular systems. W. Marszalek d315
On using orthogonal functions with singular systems. S.L. Campbell d315
Separation of matrix eigenvalues and structural decomposition of large-scale systems. L.S. Shieh, H.M. Dib and R.E. Yates p90
Shifted Legendre approach to the analysis and identification of a linear delayed system with a nonlinear gain. D.-H. Shih and F.-C. Kung p127
Simultaneous estimation of state variables and parameters for multivariable linear systems with singular pencil models. Y.C. Chen, J.D. Aplevich and W.J. Wilson p65
Stable reduced-order models for discrete-time systems. M. Farsi, K. Warwick and M. Guilandoust p137
Statistical bounds on multivariable frequency response: an extension of the generalised Nyquist criterion. D.J. Cloud and B. Kouvaritakis p97

MATRIX ALGEBRA

A two-stage output feedback design. M.S. Mahmoud, Y. Chen and M.G. Singh p279
Application of an extended Kalman filter for state estimation of a yeast fermentation. K.-H. Bellgardt, W. Kuhlmann, H.-D. Meyer, K. Schügerl and M. Thoma p226
Design of a reduced-order adaptive observer. N. Minamide, P.N. Nikiforuk and M.M. Gupta p133
Identification and control of an extruder using multivariable algorithms. L.W. Bezanson and S.L. Harris p145
Linear system reduction by the modified factor division method. T.N. Lucas p293
Regulation and control effort in self-tuning controllers. M.A. Magdy and T.S. Ng p289
Separation of matrix eigenvalues and structural decomposition of large-scale systems. L.S. Shieh, H.M. Dib and R.E. Yates p90
Shifted Legendre approach to the analysis and identification of a linear delayed system with a nonlinear gain. D.-H. Shih and F.-C. Kung p127
Statistical bounds on multivariable frequency response: an extension of the generalised Nyquist criterion. D.J. Cloud and B. Kouvaritakis p97

MODELLING

A model reference adaptive control system for discrete multivariable bilinear systems with interconnected subsystems. M. de la Sen p165
A two-stage output feedback design. M.S. Mahmoud, Y. Chen and M.G. Singh p279
Application of an extended Kalman filter for state estimation of a yeast fermentation. K.-H. Bellgardt, W. Kuhlmann, H.-D. Meyer, K. Schügerl and M. Thoma p226
Approximate models in multivariable process control: An inverse Nyquist array and robust tuning regulator interpretation. D.H. Owens and A. Chotai p1
Control laws for systems with inequality models of uncertainty. A. Świerniak p153
Identification of finite-order models of distributed systems. I.F. Taylor p276
Mathematical description of the behaviour of *Chaetomium cellulolyticum*: modelling of the growth on glucose and cellulose substrate. W. Scheiding, M. Thoma, V. Hecht, W. Rosen and K. Schügerl p199
Model reduction of discrete systems using the power decomposition method and the system identification method. C.M. Liaw, C.T. Pan and M. Ouyang p30
Modelling and idetification of a stochastic water-quality system using actual data. K.A.F. Moustafa, M.Y. Gaafar and T. Abu-El-Yazid p159
Statistical bounds on multivariable frequency response: an extension of the generalised Nyquist criterion. D.J. Cloud and B. Kouvaritakis p97

MULTIVARIABLE CONTROL SYSTEMS

A model reference adaptive control system for discrete multivariable bilinear systems with interconnected subsystems. M. de la Sen p165
Adaptive decoupling of a class of multivariable dynamic systems using output feedback. M.O. Tade, M.M. Bayoumi and D.W. Bacon p265
Approximate models in multivariable process control: An inverse Nyquist array and robust tuning regulator interpretation. D.H. Owens and A. Chotai p1
Identification and control of an extruder using multivariable algorithms. L.W. Bezanson and S.L. Harris p145
Multivariable adaptive control of baker's yeast fermentation. D. Williams and P.A. Montgomery p247
Multivariable adaptive controller for a turbogenerator. S.M.Z. Sharaf, B.W. Hogg, O.H. Abdalla and M.L. El-Sayed p83
On nonsingular value based design of controllers for robust stability. O.D.I. Nwokah p57
Simultaneous estimation of state variables and parameters for multivariable linear systems with singular pencil models. Y.C. Chen, J.D. Aplevich and W.J. Wilson p65
Statistical bounds on multivariable frequency response: an extension of the generalised Nyquist criterion. D.J. Cloud and B. Kouvaritakis p97

NETWORKS

Range-space dynamics of scalar-variable-structure control systems. B.A. White p35

NONLINEAR SYSTEMS

Biomedical engineering approach of pharmacokinetic problems: computer-aided design in pharmacokinetics and bioprocessing. A. Segui, J.P. Lebaron and R. Leverge p217
Chaos in Chua's circuit. F. Ayrom and G.-Q. Zhong p307
Observations-weighted minimum-variance control of nonlinear systems. M.J. Grimble p172
On the controllability of a class of nonlinear systems with time-varying multiple delays in control. K. Balachandran p297
Range-space dynamics of scalar-variable-structure control systems. B.A. White p35

OPTIMAL CONTROL

Application of modern control for biotechnological processes. A. Munack and M. Thoma p194
Fixed-wing-angle BTT control. D.J. Roddy and G.W. Irwin p111
Observations-weighted minimum-variance control of nonlinear systems. M.J. Grimble p172

OPTIMISATION

Application of modern control for biotechnological processes. A. Munack and M. Thoma p194

PERTURBATION THEORY

Principal direction alignment: a geometric framework for the complete solution to the μ-problem. R.W. Daniel, B. Kouvaritakis and H. Latchman p45

POLES AND ZEROS

Adaptive controller with desired pole/zero assignment. C.-M. Lin and B.-S. Chen p301
Representation and transient behaviour of self-tuning controller for deterministic disturbances. T.S. Ng and M.A. Magdy p285
Self-tuning control of offset using a moving average filter. C.S. Berger p184

POLYNOMIALS

Adaptive controller with desired pole/zero assignment. C.-M. Lin and B.-S. Chen p301

PROCESS CONTROL

Approximate models in multivariable process control: An inverse Nyquist array and robust tuning regulator interpretation. D.H. Owens and A. Chotai p1
Control in bioprocessing (Editorial). J.R. Leigh and M. Thoma p. 193. J.R. Leigh and M. Thoma p193
Mathematical description of the behaviour of *Chaetomium cellulolyticum*: modelling of the growth on glucose and cellulose substrate. W. Scheiding, M. Thoma, V. Hecht, W. Rosen and K. Schügerl p199

SIMULATION

Approximate models in multivariable process control: An inverse Nyquist array and robust tuning regulator interpretation. D.H. Owens and A. Chotai p1

STABILITY

Observations-weighted minimum-variance control of nonlinear systems. M.J. Grimble p172
Reply to comments on a simplified analytical stability test for systems with delay. D. Hertz, E.I. Jury and E. Zeheb d142
Representation and transient behaviour of self-tuning controller for deterministic disturbances. T.S. Ng and M.A. Magdy p285
Stable reduced-order models for discrete-time systems. M. Farsi, K. Warwick and M. Guilandoust p137

Conference reports

1986 American control conference M.J. Grimble p317

Book reviews

Comparative models for electrical load forecasting. D.W. Bunn and E.D. Farmer (Eds.) p143
Control system principles and design. E.O. Doebelin p110
Optimal control. Frank L. Lewis p320
Process dynamics estimation and control. A. Johnson p319
Recursive estimation and control for stochastic systems. Han-Fu Chen: p41
